

# HARB'S OASIS

## LANDSCAPING & GARDEN CENTER

### RECOMMENDATIONS TO MAINTAIN YOUR LANDSCAPE

#### SEASONAL MAINTENANCE PROGRAM

##### February/March

1. Use *Fertilome* slow release tree and shrub fertilizer.
2. Apply *Greenlight* "Amaze" for existing and new beds to prevent weeds.
3. Use *Ironite* or Aluminum Sulphate to correct yellowing (an iron deficiency).
4. Top mulch all beds once or twice a year.
5. Use *Fertilome* "Weed & Feed" on your lawn or *Hi-Yield* "Dimension".
6. Apply a Systemic Drench for general insect control around trees and shrubs only.
7. Fertilize with *Miracle Gro*, *Bloom Start*, or *Superbloom*, or use Blood Meal on flowering annuals.

##### March/April

8. Apply *Fertilome* "Azalea, Camellia and Gardenia" food.

##### May

9. Apply *Fertilome* "Lawn Food Plus Iron" to green up lawns.
10. Repeat steps 1, 2, 3, 6, 7, & 8.

##### August/September

11. Repeat steps 1, 2, 3, 6, 7, & 8.

##### November

12. Apply *Fertilome* "Winterizer" on your lawn for overwintering protection.
13. Repeat steps 2, 4, & 6.

#### WATERING FOR NEW LANDSCAPES

- **April-October:** Water deeply every day for two weeks. Adjust for rainfall.
- **November-March:** Water deeply three times per week. Adjust for rainfall.
- We recommend *Fertilome* "**Root Stimulator**" applied to all newly planted trees & shrubs. It also works great on annuals & perennials to give their roots a strong start to help them survive the summer heat and drought. Can be applied throughout the year.
